## Didsbury Defeats Carstairs.

The first game in the baseball schedule of the Rosebud League was played here last Friday night between Didsbury and Carstairs. There was a big crowd present and interest on the part of the fans was intense throughout the play.

Some of the features of the game were a two bagger by Cook with the basis loaded, bringing in the winning runs.

Two splendid catches in centre field by Wayne Stauffer and three by Sheriff.

For the first game the pitching by Robinson, Stauffer and Stuhl was splendid, but the Didsbury team were short on support and indicated that considerable practice is necessary. Charlie and Harold got a number of errors "out of their systems, but there were two good reasons for their erratic playing.

## The British Strike

The outstanding event of the week in which this article is written is the great strike in Great Britain affecting nearly five million workers and crippling all the public services of the country. This great national strike also serves to once again demonstrate how closely the interests and welfare of one country are bound up with other countries. The day the strike went into effect the price of wheat in Canada and the United States made a considerable drop, while values of many stocks fell on the New York and other markets. No longer does one nation live unto itself alone, and even its purely domestic troubles have an international and world effect.

The unsettled condition of the mining industry in Great Britain lies at the bottom of the strike, just as it has been the cause of more or less trouble for many years past, and until a permanent and satisfactory solution of the coal mining problem has been found it would appear that trouble must be expected. In the case of the present strike, precipitated by the miners' refusal to accept a reduction in wages and a lengthening in the hours of labor, which the mine owners insist is necessary if the industry itself is to survive, railway employees, printers, dock and transport workers, the building trades, iron and steel workers, and others organized under the Trades Union Congress, ceased work in sympathy with and to enforce the miners' demands.

It is difficult for the people in this country to fully grasp and understand the underlying causes of the discontent and financial difficulties existing in the British coal mining industry. Undoubtedly the war has had something to do with it, because there is not the same world-wide demand for British coal as existed prior to 1914, and furthermore, the depression in British industry owing to lack of orders from foreign markets following the war has likewise had its effect.

Competent observers from other countries find another cause for the trouble—a basic one. They insist that the whole system of coal mining in the British Isles requires to be modernized, and that until this is done the business cannot be profitable to the mine owners, and consequently satisfactory wages and working conditions cannot be provided the miners. To effect the changes necessary will call for the expenditure of enormous capital sums, and, for a time at least, a decrease in the number of men for whom employment can be found. This latter is undoubtedly the chief difficulty.

In other words, it is held that the present method of pick and shovel mining must be replaced by the utilization of machinery in the mines for purposes of cutting the coal. This would mean fewer men employed, but as large or larger output of coal at a considerably less cost per ton, thereby assisting all British industry and enabling British coal to again compete successfully in the market of the world. If these experts are right, then it would appear that the British coal industry and British miners must pass through the same experience as did the cotton industry following the advent of machinery, which caused a terrific upheaval at the time and much distress, but ultimately gave that industry its great supremacy.

Evidence is not lacking that the same process of modernization is necessary in other lines of British activity, the building trades for example. A group of United States experts connected with the real estate business recently visited London, and they report that it takes about 100 per cent. longer to put up a given structure in London than it would in New York, and, despite the much higher wages paid artisans in New York, the cost of the building is just as great in London as in New York. The reason is found in slow-moving workmen and out-of-date appliances. Two examples of the latter may be mentioned.

A huge modern steel structure is being erected in London on the site of Devonshire House in Regent Street. The hoisting of the big steel beams was being carried on by a group of men turning handles on an old-fashioned derrick, with the result that the beams moved upwards slowly by inches. On this side of the water a donkey engine would do the hoisting in a fraction of the time. On the site of another structure close by, pick and shovel men were excavating for a foundation. In Canada and the United States a steam shovel would be on the job, and do it in short order and at much less cost.

British workmen and their Union leaders have yet apparently to learn the lesson that the introduction of the most modern methods are essential to their own progress and welfare. Lowered costs of output and production is necessary if British industry is to compete with the world, and such a reduction in costs would enormously increase the volume of production, thus providing, not less employment because of the use of machinery, but more employment, better wages and shorter hours because of the greater demand created through lowered costs and greater expedition in the completion of work.

## Farm Lands in Demand

A Revival of Buying of Farm Lands Has Set In

With farm land values just at the upturn and conditions improving, this season has brought a revival of buying in farm lands equal to that of 1913, said F. H. Harman, president of the Winnipeg Real Estate Exchange, recently.

"One company alone has been averaging sales of 20,000 acres of farm lands a month since last October," Mr. Harman said. "In each case the land, mostly wild land for pasturage and stock raising purposes, has been sold to bona fide farmers and not to speculators or investors. Substantial initial payments have been made and the buyers are meeting subsequent payments promptly. The biggest demand for land recently is in Saskatchewan and Southern Alberta."

## Piloted By Youngest Aviator

Indianapolis Woman 104 Years Old Established New Record

Mrs. Mary Huffman, 104 years old, Indianapolis, set what was believed by local flying officials to be a world's record for the age of persons riding in an aeroplane when she made a 15 minutes flight. She was piloted by Farnum Parker, of Anderson, 15 years old, the world's youngest aviator. In the plane with Mrs. Huffman was her five-year-old great grandson, Carrol Davies.

## Has Patented Atom Engine

Idea May Develop Into Most Dramatic Achievement of Century

A Dutchman has recently received a patent for running an engine on power obtained from the atom. He has discovered that if mineral sands containing titanium are heated to a temperature of 1,700 degrees centigrade the atoms disintegrate, and an enormous amount of heat is generated. The sand is heated in a small electric furnace, and the heat caused by the sudden breaking-up of the atom is forced by a pump through tubes that heat the water in a boiler, and supply the power to drive an engine or turbine. This patent has passed through the patent officer almost unnoticed, but it is actually the first stepping-stone to the realization of the power from the atom which all the world is waiting for. It may easily develop into the most dramatic achievement of the century.

## The Hudson Bay Route

Dominion of Canada Pledged to Carry Work to Completion

The fact is, of course, that every government in Canada for nearly forty years has advocated and furthered the Hudson Bay route, and four successive prime ministers, two of them Liberals and two of them Conservatives, have, while in office, seen great sums expended on the enterprise.

The railway has, at great expenditure by successive governments, been carried to within seventy or eighty miles of Hudson Bay and—awaits completion. It is to be completed, as it should be, and as public men of each and all parties assured the people of the west it would be. The talk in West Middlesex and elsewhere in Ontario and Quebec about the completion of this enterprise being a steal, a waste, a bribe, is quite dishonest.

The acoustics of the Dominion are very good, much better than many partisans suppose. What is said in the west and is said in the east, politically, is overheard all across the Dominion with a distinctness that leaves nothing to be desired. The improved hearing of the country, when everybody knows about it, will make for straighter talk in politics.—Toronto Star.

## Pilot Makes New Record

Flies Heavy Plane London to Paris in Ninety Minutes

Some idea of the astonishing progress in air travel can be had from the record recently made by Captain MacKintosh, an Imperial Airways pilot. The officer flew a big fifteen-seater, three-engined Handley-Page air liner from London to Paris in 90 minutes! The plane carried a full load of passengers and goods, and, freighted, weighed six tons.

The average speed of the flight of 250 miles was 154 miles an hour, a new record for a big passenger plane of this size.

The actual speed record between London and Paris is held by a four-seater Napier D. H. express plane, which made the flight in 87 minutes; which means that Captain MacKintosh with his giant passenger liner lacked only three minutes of the record set by the light "speed" machine.

## Britain Would Aid U. S.

The British Government has a plan for assisting the United States to tighten its check over rum running. The plan does not go as far as a new treaty, but according to official circles will take the form of permission for United States revenue-cutters to visit the Bahamas and co-operate with British ships in carrying out searches for contraband liquor.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

## Suffered From Kidney Troubles For Years

Nova Scotia Man Affirms Dodd's Kidney Pills a Truly Wonderful Medicine

Mr. Wm. L. Whitman Suffered From Kidney Complications and Found Relief in Dodd's Kidney Pills.

Beaver Harbour, N.S.—(Special).—"My trouble started from a cold and strain. I have suffered for years from kidney trouble. Rheumatism, Bright's Disease and Lumbago being some of my chief troubles. My head used to ache and my appetite was fitful. I have taken Dodd's Kidney Pills and found them very satisfactory. I think they are truly a wonderful medicine. Really they are not used half enough by a good many people."

This statement comes from Mr. W. L. Whitman, a well known resident of this place. Bright's Disease is one of the most serious forms of kidney disease. It can be successfully treated with Dodd's Kidney Pills. But the better way is to guard against such diseases as rheumatism, dropsy, diabetes and Bright's Disease by using Dodd's Kidney Pills when the kidneys first get out of order.

## NO PEACE UNTIL STRIKE ORDER IS WITHDRAWN

London.—"The general strike is a challenge to parliament and is the road to anarchy and ruin," the British prime minister, Stanley Baldwin, thus characterized the vast Labor movement in support of the miners' strike, in a message printed by the official government paper, The British Gazette.

He calls upon all good citizens to stand behind the government "to preserve the liberties and privileges of the people of the British Isles."

In the House of Commons the prime minister made the unequivocal declaration that the strike order must be withdrawn before the government would resume negotiations for industrial peace.

At the same session of the commons, Sir William Joynson-Hicks, the home secretary, intimated that troops would be employed, if necessary, to maintain services of vital importance.

In setting forth the situation to the press, the government's spokesman at the admiralty declared that the nation was meeting the crisis quietly and calmly, with food and fuel supplies guaranteed for many weeks; an official of the Trades Union Congress at Eccleston Square, Labor headquarters, announced that the railway tie-up was the most complete in the history of Great Britain, and that the striking men and their women-folk were standing solidly together for the cause of Labor.

## Requisition Cafe For Amusement Of Soldiers

Magnificent Restaurant Now Used By British Army On Rhine

London.—The Walhalla at Wiesbaden, one of the most luxurious restaurants in Germany, has been taken over by the Navy, Army and Air Force Institute for the benefit of the army of occupation on the Rhine.

A magnificent restaurant on the ground floor, where wealthy Germans once ate expensive meals, is now used only by British soldiers and their wives, and a large theatre on the first floor has been converted into a moving picture theatre and lecture hall.

"We wanted to take over this building because the facilities for the amusement of the troops in Wiesbaden were limited," said E. H. Cherry, assistant general manager of the N.A.A.F.I. "There was great delay on account of financial reasons, but now the place has been requisitioned by the war department."

"There has been considerable opposition in Germany, however, and many newspapers have declared that we have violated the spirit of Locarno."

## Vessels Liable To Customs

Those Delivering Canadian Winter Storage Cargoes At U. S. Ports Come Under Tariff

Ottawa.—There is apparently some misapprehension, it was stated here as to the position of the United States delivering Canadian winter storage cargoes at United States ports. These vessels are liable to a 25 per cent. customs duty not by virtue of an order-in-council, but under the customs tariff which can only be amended by act of parliament. Under a provision of the Canada Shipping Act, however, the government may, by order-in-council, permit foreign vessels loaded with winter storage grain to discharge at a Canadian port in the spring. Such an order has been passed for several years.

### Embargo Lifted

London.—After holding up the appearance of the British Worker, the labor paper issued in answer to the government's British Gazette, police permitted its appearance from the office of the Daily Herald, the regular labor newspaper. The embargo was lifted after a sample copy had been inspected.

## Slaves In Burma Freed By Britain

Deputy Commissioner Barnard Secures Liberty of Over Three Thousand

Allahabad, British India. — After several months spent in the wilds of Burma, stamping out slave trading and negotiating with the Nagas for the abolition of human sacrifice, Deputy Commissioner J. T. O. Barnard, of the Burma frontier service, has arrived in Calcutta.

Barnard tells a most-interesting story of his activities. The number of slaves set free at a cost of 19,000 rupees was 3,445, which did not come up to the exaggerated expectations which had been entertained.

There were no limitations, however, to the gratitude and unimaginable joy of the Kachins, who were emancipated through the act of the "great white chief," Sir Harcourt Butler, governor of Burma.

In an area of 2,000 square miles are 25,000 people hankering after human sacrifice. Evidence was found of this practice and also of the care taken to prepare the victim. Usually he is placed in a kind of stock pen and fed and watered like an animal for two months before being sacrificed.

## Illicit Gold Traffic Alarming Mine Owners

Mines in South Africa Looted of Large Amounts

Capetown.—Some remarkable revelations regarding the extent of illicit gold traffic have been made in South Africa recently. The conspiracy is centred in the heart of the gold mining industry in Johannesburg, but its ramifications extend to England and India. It is estimated that some £350,000 worth of gold is dealt with illicitly each year.

The gold is, in the first place, filched from the many mines that lie alongside the Witwatersrand. It is not an easy matter to steal gold from a gold mine. Like the diamond industry, there is a constant supervision. Yet gold continues to disappear from the mines and the extent of illicit gold buying is shown by the number of convictions in the Johannesburg courts each year.

The mining authorities, aware of these constant leakages of gold, are puzzled to account for them.

### Regina C.P.R. Hotel Approved

Montreal.—The city of Regina is to have a new \$1,500,000 hotel. At the 45th annual meeting of Canadian Pacific Railway shareholders here, approval was given to an agreement between the Regina civic authorities and the company for the erection of the structure.

### Plans Super-Dirigible

Pasadena, Calif.—Thomas D. Slate, noted inventor of fuel improvements for aircraft, announced here that he had signed a contract with the government to construct a super-dirigible capable of making a non-stop flight to the North Pole and return in seven days.

### Ship Canadian Cattle

Toronto.—Cattle boats are leaving Canada for England with regularity, unaffected by the British general strike and the Canadian export trade in livestock generally is not expected to be affected, in the opinion of H. P. Kennedy, large shipper of livestock.

## H. B. RAILROAD QUESTION COMES BEFORE SENATE

Ottawa.—When the interim supply bill of one-twelfth was presented in the senate by Hon. Raoul Dandurand, Senator W. B. Ross, opposition leader, drew attention to the item of \$3,000,000 for the Hudson's Bay Railway in the estimates. He said the senate had not been informed what use was to be made of this money. Whether the Hudson's Bay Railway was to be part of the Canadian National Railway or an independent system operated by the government. He would also like to know where this \$3,000,000 was to be expended and how.

Senator Dandurand said there were 90 miles of road to be completed. The Hudson's Bay Railway was not, at present, a part of the Canadian National system, but was administered and controlled by the railways department. The minister of railways had asked the Canadian National system to supervise the completion of the work. The interim supply voted would be used for maintenance and repairs on that portion of the road on which rails had been laid. In voting money for the Hudson's Bay Railway the government was carrying out the policy of all governments of recent years. He expected the work would be proceeded with diligently until completed.

## Sane Government Or Anarchy

Daily Mail Says British People Will Not Submit to Odious Tyranny

London.—The Daily Mail says there are now two governments in Great Britain. One the law government representing 40,000,000 persons, and the other "an unconstitutional, revolutionary government representing 3,600,000 trade unionists."

The paper declares that one of these governments must go. "We are not going to see J. H. Thomas and Ramsay MacDonald imitating the work of Lenin and Trotsky here," the Daily Mail says of the Labor leaders. "Nor will the British people—which is entirely different from the pathetic, submissive mullks of Russia—submit to such an odious tyranny."

### Alberta Air Patrol

Ottawa.—G. C. Coote, Progressive, McLeod, asked the minister of the interior in the house if the air force forest patrol in Alberta was to be carried on this year. Hon. Charles Stewart replied that arrangement would be made and the service carried on would be continued this year.

## Figures In British Strike

## Plan Most Northerly Mounted Police Post

Efforts Being Made to Place One Within Ten Degrees of Pole

Toronto.—A determined effort is to be made to land three Royal Canadian Mounted Policemen on the Bach Peninsula, which is latitude 79, only 10 degrees from the North Pole, according to George P. Mackenzie, officer in charge of Arctic expedition this year. If successful this will be the most northerly R.C.M.P. post, and will be the farthest north which Canada has ever extended her administrative officers.

If Bach Peninsula can be reached these three mounted policemen will represent all branches of the Dominion Government. They will open and conduct a post office, act as mining recorders, if necessary, will act as game wardens and will take applications for naturalization if any are made.

## Death Of Forestry Expert

A. H. Mitchell Was Well Known For Work Done In Western Canada

Lethbridge.—A special to the Herald from Macleod says that A. H. Mitchell, aged 68, well known forestry expert, died at Penticton, B.C., following three months illness from kidney trouble. Mr. Mitchell, who came to Macleod from Scotland in 1898, was widely known over the prairies, having travelled with the Dominion forestry branch tree planting car for a number of years. He was a tree enthusiast. His father was chief forester to Lord Rosebery.

## BRITISH CABINET URGED TO MAKE CONCESSIONS

London.—In the House of Commons, former premier Lloyd George joined the Laborites in deploring the precipitancy shown in breaking off negotiations, which he characterized as a grave error. Ramsay MacDonald begged the cabinet not to remain adamant, but to make some concession in order to get the government and the Trades Union Congress around the conference table.

For the first time the debate brought out how slight a touch was needed to sever the thread of negotiations and send the sword of a general strike crashing on the heads of the British people. It was the "overt act" of a few printers in the Daily Mail plant, who, acting without authority of the unions' representatives, disagreed with an editorial and stopped the machinery of the paper, preventing its publication.

Ramsay MacDonald, in a further plea for bringing the government and the Trades Union Committee together again, said that after receiving the government's final communication the Trades Union Congress and miners sent a committee from their room to the prime minister's room to discuss the situation. When the committee arrived, Mr. MacDonald declared dramatically, they found the door locked and the room in darkness.

In consequence of this disclosure, members of the House of Commons repeatedly demanded to know the terms of the formula mentioned, and whether the miners had accepted it since the breakdown, but information on this point was not forthcoming.

The Laborite, James Maxton, Glasgow, stated that the strike had been precipitated because the dignity of a great newspaper proprietor should be injured. It was disgraceful that the whole nation's services should be stopped and that millions should suffer because of this.

## Suggests Nation-Wide Celebration

Senate Urges Fitting Recognition of Sixtieth Anniversary of Confederation

Ottawa.—The senate adopted a resolution that "it is expedient that preparations be made for the celebration of the sixtieth anniversary of the Confederation of the Provinces of Canada."

Senator Lewis, who proposed the resolution, believed the celebration should be made nation-wide, and should not be confined solely to Dominion Day.

The anniversary celebration, he declared, should be made a feature of all celebrations of every character throughout the year.

Senator Raoul Dandurand, government leader, thought that advantage should be taken of the sixtieth anniversary of confederation to bring before our people the matter of our national growth and achievements.

## Monument For Great Explorer

Douglas Fir Trees Planted Near Captain Vancouver's Grave In England

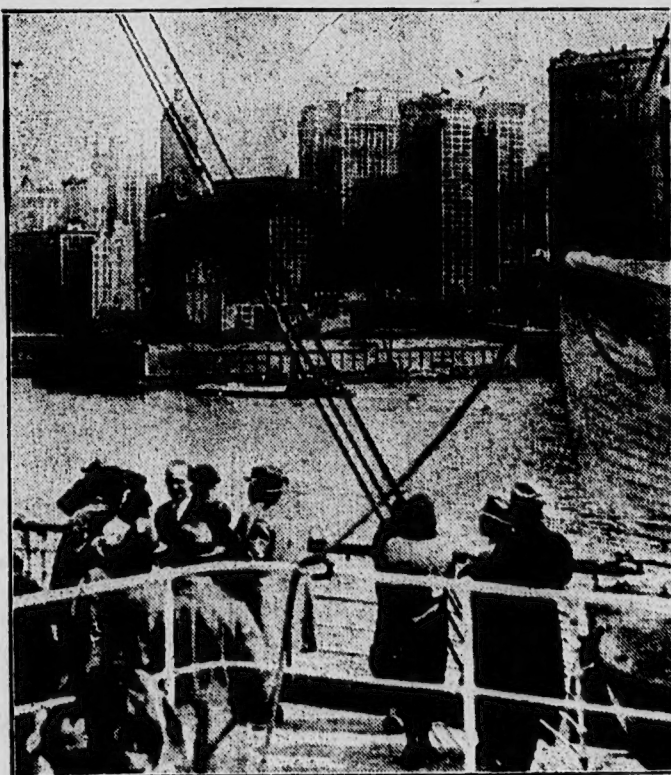

London.—In the old parish churchyard of Petersham, Surrey, the Hon. F. A. Pauline, agent-general for British Columbia, assisted by J. S. Corbett, secretary of the Empire Forestry Association, has planted near Captain Vancouver's grave a number of young Douglas fir trees grown in Kew Gardens from seeds sent by the native sons of British Columbia, as a lasting memorial to the great explorer.

### Table Came From England

Berlin.—The English table upon which Emperor William signed the mobilization order, Aug. 1, 1914, for the commencement of the world war, is now on display to visitors in the Imperial castle here. The table, which came from England many years before as a gift, was made out of boards from Admiral Nelson's flagship.

The Sky Line of New York

As seen from the deck of the Canadian Pacific flag ship Empress of Scotland after she had docked there April 10, completing an 129-day voyage around the world, commencing December 3rd. Many unique spectacles were witnessed by passengers including an eclipse of the sun at Benares which scared over a million Hindus into the sacred waters of the Ganges in the hope of avoiding the destruction of the world; and a human sacrifice when a Hindu youth committed suicide on the altar of the goddess Kali in her temple at Calcutta. The Sultan of Johore, a Malay Peninsula State, introduced some of the lady passengers to his harem. Seven honeymooners took the trip and their example was so contagious that 27 couples had become engaged to be married at the termination of the world cruise.

## An important fact about

CHEVROLET

THIS one-piece windshield is the same construction as found on the much more expensive Fisher Body closed cars. It permits full, unobstructed vision and, when raised, perfect ventilation.

When partially raised it functions as a cowl ventilator the full width of the cowl. The windshield is raised and lowered by a few turns of a Ternstedt regulator.

All closed models are equipped with automatic windshield wiper. A textile leather-covered steel sun visor and cowl lamps are also standard equipment.

A dance will be held in C. H. Rinehart's barn on Friday, June 11th. Good music. Everybody welcome.

Holy Communion will be held at St. Cyprian's on Sunday next, May 23rd, (Whit Sunday) at 9.30 a.m., and evening service at 7.30.

Mr. and Mrs. A. Meck and family, together with some friends from Carstairs, leave this week by auto for Kitchener, Ontario, where Mr. Meck will stay for the summer.

Miss Alice Gratz and Miss Winnie Moyle who have just graduated from the University of Alberta, left this week for New York, where we understand they have secured good positions.

The Lone Pine W.I. will hold a picnic at Lone Pine Hall on Monday, May 24th. There will be the usual picnic dinner, both baseball and sports. Dance at night. Come and have a good time.

The fourth annual stampede will be held in Carstairs on Wednesday, June 16th, 1926. They have planned to make this bigger and better than ever. Keep this date open and watch for further particulars.

Four cars of golfers, caddies and spectators drove to Innisfail Sunday and after playing the course enjoyed a picnic lunch. Bert Cressman had the misfortune to break one of his clubs while attempting to uproot a few stumps. All report a splendid time.

St. Cyprian's church is being painted and kalsomined inside this week and the seating and other wood-work stained and varnished. The altar also is undergoing alterations. H. D. Booker has the brush work in hand and W. Pitt the carpentry.

The Elkton Co-operative Creamery Association has leased the creamery at Elkton and commenced business on Wednesday, May 19. The directors of the organization are Alec. Hogg, A. Paterson, E. Reese, F. Byrt and M. Campbell. A. Paterson will act as manager, and R. Tanner has been appointed secretary-treasurer.

Rev. Nissen of Westcott will be leaving on Monday next, May 24th, as delegate to the Synodical Convention to be held in St. Louis, and to attend also the Lutheran Layman's League Convention held in the same city. He expects to return about July 1st. He will be held at Westcott, particulars of which will be announced from time to time. Mrs. Nissen will accompany her husband as far as Fergus Falls, Minn. Mr. and Mrs. N. J. Jacobson are leaving the same day for Adair, Iowa, and will travel with Mr. and Mrs. Nissen.

The Rugby W.I. met at the home of Mrs. J. A. Hughes on Thursday, May 6th. Good roads and fine weather permitted a large attendance, and a great deal of business was dealt with. Mrs. Rosegood gave a very interesting paper on Legislation which was followed by an additional paper read by Mrs. Parker, both being very interesting as well as educational.

The Handkerchief bazaar was a great success, the sale of which amounted to \$11. The cheese demonstration by Mrs. J. Hughes was the interesting feature of the day and we hope the men folk will get plenty of cheese in the future. The meeting was then closed by singing "God Save the King," after which a very tasteful lunch was served.

## Westcott.

C. McFarland is talking of farming next year. We are wondering if he will be batching or not.

We have noticed that the blue car doesn't stop lately at the usual resting place, where is the new station, or has no one found it yet.

The club meeting on Friday, night was well attended, about 60 people being present. The program was shorter than usual and was preceded by a ball game and a rough and tumble basketball game. The next meeting will be held on June 11.

The Minstrel Troupe met again Saturday night and the program which is to be given in Didsbury on June 4th is well under way. This promises to be a brilliant program of wit, song and discourse, and according to reports will be much better than the one presented at the Westcott school.

We are much obliged for the help with the Westcott Items, Alice. Keep up the good work.

Olav Sande was seen going east on high on Sunday evening about dusk. What is the attraction?

Sunday evening, June 1st is the date set for the Children's Day program in the Evangelical church. A program committee has been appointed consisting of Mr. McFarland, Mrs. J. Tuggle, Miss Tittsworth and Miss L. Snyder. The committee is at work and the outlook promises a real worth while program. Watch for further announcements.

We are sorry to hear that Mr. F. A. Murphy met with a serious accident when in examining the tooth of a horse, he was suddenly struck by the front feet of the animal, fracturing two of his ribs.

We see that Mr. I. Leony is escorting his aunt and uncle in his new car.

Mr. and Mrs. C. C. Rhinehart, Mrs. Wamsley and Mr. C. McFarland spent Sunday evening at the Snyder home.

Mr. W. Martz is now working at J. A. Hughes.

Mr. and Mrs. Oris Hembling visited at Hughes' home for a few hours on Saturday last.

## Big Four Baseball Team.

Golden Text: All the nations of the earth shall be blessed in Him. Genesis 18:18.

Lesson: Genesis 18:1-8, 16-19.

Devotional Reading: Psalm 133.

#### Explanations and Comments

Abraham Entertains Angels Unaware, verses 1-8.—"And Jehovah appeared unto Abraham" as he sat at his tent entrance at noon in Hebron; the first verse says, and the second speaks of "three men" appearing suddenly on the scene. Because of verses twenty-two and thirty-three, we must understand that the story includes among the three men, Jehovah himself. "There are passages in the Bible in which manifestations of God are described which seem to imply that he was confined within the limitations of space, or that the human form really was proper to him. He is said to have walked in the garden in the cool of the day; to have come down to see the town which men did build; to have been one of three men who appeared to Abraham, and to have eaten that which was set before him. Under these passages there lies not only a vivid conception of his personality, but a vivid conception of a profound and more strictly redemptive truth, namely, that he reveals himself and enters into the closest friendship with men" (Dr. A. B. Davidson).

A Softly-Flaring Yet Slender Silhouette

The styling of printed silk on tailored lines is a venture in its expression that is meeting with the approval of the modish woman. Cut with front fastening from neck to hem in an unbroken line, this clever frock presents a slenderizing silhouette altogether flattering to the woman of larger proportions. The upper part of the frock molds the figure to the hip-line, where it springs into a graceful flare at the sides and back, the front being perfectly flat. A long the collar of contrasting color material is wrapped about the throat, but the collar is adjustable and may be worn open with the ties hanging in front. The long set-in sleeves are trimmed with tailored cuffs matching the material of the pointed patch pocket and the collar. No. 1333 is in sizes 38, 40, 42, 44, 46 and 48 inches bust. Size 40 bust requires 4 yards 39-inch figured, and 1/2 yard plain material. Price 20 cents.

## COMFORT DEPENDS ON GOOD DIGESTION

### Weak Stomachs Can be Made Strong Through the Use of Dr. Williams' Pink Pills

The sufferer from indigestion is greatly to be pitied. This trouble assumes various forms such as pain after eating, gas on the stomach, sour stomach and often vomiting after meals. The sufferer cannot get relief by cutting down his food to a starvation basis. That only still further weakens. What is needed is better digestion, not a poorer diet. And the way to get a better digestion is to so enrich the blood that the stomach will do the work nature intended. As a tonic for building up the blood nothing else can equal Dr. Williams' Pink Pills. As this new blood courses through the veins strength and tone is given the stomach and the pangs of indigestion disappear. Not only this, the whole system is strengthened and new life and vim comes to the former sufferer. The value of Dr. Williams' Pink Pills in cases of this kind is proved by the experience of Mr. E. G. Malcolm, Port Malcolm, N.S., who says:—"For several years I was a great sufferer from indigestion. I could not eat meat or potatoes, and often could not retain the food I did eat. Only those who have been afflicted with this trouble can realize the suffering I endured. I took a lot of doctors' medicine, but it did not give me more than temporary relief. I also took other remedies recommended, with no better results. Then I read in a newspaper the case of a woman whose symptoms were like my own, who found new health through Dr. Williams' Pink Pills. I at once got a supply of these pills and had not taken them very long when I began to find relief. Thus encouraged I continued the use of the pills, and I can but sum up what they did for me by saying that they made me feel like a new man. Every trace of the trouble has disappeared and I can now eat and enjoy my meals as well as anyone."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### Gopher Poisons

By V. W. Jackson, Professor of Biology, Manitoba Agricultural College.

All gopher poisons contain strychnine, they differ only in amount and mixture. The government standard is 12 grains of strychnine sulphate per fluid ounce or 2.5 per cent, or about 42 grams of strychnine to a gallon of water to treat as much grain as will soak it up. Strychnine has two forms—the natural alkaloid and the sulphate crystals, which are more soluble but less poisonous, so that it takes 5 ounces of the sulphate to be equal to 4 ounces of the alkaloid—so the sulphate is more commonly used because cheaper and more soluble. But gopher poison must be made attractive and alluring with sweetness and aroma.

The North Dakota mixture contains glycerine, saccharine, molasses and baking soda. The Canada vinegar mixture depends upon vinegar for its flavor and aroma. Other mixtures use aniseed oil for flavor and aroma—all good in their way, all effective in proportion to the strychnine present.

The North Dakota mixture is the most popular homemade one, and made as follows, for quarter-section, section, or municipality.

For 1/4 Section	Section	Municipal.
20 qts. oats	3 bus. or 300 bus.	100 quarts
1 oz. strychnine	5 ozs. 32 lbs.	
1 oz. baking soda	5 ozs. 32 lbs.	
1 oz. starch	5 ozs. 32 lbs.	
1/2 pt. molasses	1 1/2 pts. 16 gal.	
Tbsp. glycerine	3 1/2 ozs. 22 lbs.	
1/2 oz. saccharine	1/2 oz. 62 1/2 ozs.	
Labor	30 mins. 30 min. 50 hrs.	

Probably cost \$2 for 1,200 gopher holes or average quarter section. Approximately \$8.00 for 6,000 gopher holes, average section. 600,000 gopher holes, 100 sections (half municipality), \$800.00.

Make a pint of hot starch paste first and slowly sift in the strychnine and soda powder and stir so it will not boil over. Then add the molasses, glycerine and saccharine and stir well. Then pour the warm mixture over 20 quarts of clean oats. Costs about 2c for 10 gopher holes and saves bushels of grain and a bumpy field, if done in time (April and May).

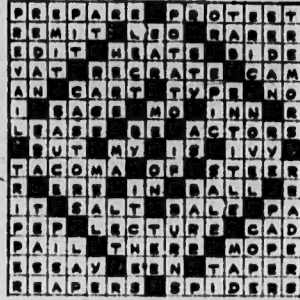

"Come and dine with me tomorrow evening, old man."

"Afraid I can't; I'm going to see Hamlet."

"Never mind, bring him along too."

#### Answer to Last Week's Puzzle

#### Life On Mars Quite Probable

Prof. C. A. Chant, of the University of Toronto, told the convention of the Ontario Educational Association there that the existence of life on the planet Mars was more than a possibility, according to conclusions drawn from observations made in 1924 when the planet approached close to the earth. Prof. Chant described the work of the astronomers who observed Mars during that period.

### THE STORY THUS FAR

Joanna, pretty, flapperish, shop girl is informed by Graydon, her employer, that an unknown man has given her a million dollars to spend. There are no "strings" to the gift, she is not even to know the name of the benefactor. Overwhelmed by this undreamed-of wealth, unable to comprehend it she confronts banker Eggleston to learn only that the story is true—other than that he can tell her nothing. At the bank she meets Brandon, man-about-town, nephew of the banker. He helps her draw her first check and sardonically informs her that he intends to make love to her. With ten thousand dollars Joanna leaves the bank and goes to her furriers—a cheap side-street store—to buy a new fur coat.

### CHAPTER IV.—(Continued).

"Oh, I see!" he breathed. "Excuse me Miss, for thinking you would bother with giving me a date. I might a' known you was bait for big fish only. Where to, did you say Miss?"

Joanna snapped her bag. The lines that some of her boys would have recognized as sure signs of a squall, formed about her lips—the much too-rab lips.

"Say, you!" she said; "Take a look at your license. It's for driving, and it says nothing about fish. So get along and see if you can steer straight."

The chauffeur was not impressed. "And where to, Miss?" he repeated, still very stiff.

"I'd like to tell you one place—but you can go there when I'm done with you. Meantime just pull up in front of my furrier's, will you?"

He touched his cap and received the address. "My furrier's" proved to be in a neighborhood not frequented by the most fashionable shoppers—in fact, by the most unfashionable ones

only, those that dealt in installments. The name was Cohen.

Mr. Cohen came out of the back of his store, in response to the clamorous clanging of the bell set off by the opening of his door. As was his custom, he had set his face into its blandest formations. When he saw that his caller was "Miss Twenty-seven," his face became stern. He assumed his most relentless manner, and tinged it with suspicion.

"This isn't a holiday," he greeted the girl; "Fired?"

"Yep!" she returned, with a brightness that irritated him.

"Never mind the Daddy Cohen stuff," Joanna admonished. "Trot out the wrap."

"So that's how it seems to you, Miss?" he threatened her. "Well, just hear this, you pony up the twelve dollars that's overdue on that coat, and you give me two weeks ahead, that's twelve dollars more, or you leave the coat, understand?"

"Sure I understand," Joanna returned. "But if you've got time to put the conversation on ice for a bit, suppose you slip me that secondhand thing you've had in your window since your grandmother died—the one that looks like a good imitation of mink. If it's not moth eaten maybe I'll take it along."

"Her furrier," twelve dollars her creditor, twelve dollars that he saw vanish in the abyss of a lost job, advanced upon her with his hands speaking in eloquent announcement of a threatening torrent of words. But before the words came he glimpsed through the glass panes of his shop door, the expensive limousine at the curb. He gave a puzzled glance at the girl and saw in her a connection between the automobile, her—her absence from the store.

"How do you like my car?" Joanna inquired, sweetly. "I'm having my other done in mauve, to match the upholstery, you know."

Mr. Cohen's blandness returned. He nodded as if his wisdoms were satisfactory to him. Mr. Cohen knew many things that were, more or less, connected with his business of decking pretty young women in furs. He was paternal—almost overwhelming: "I knew it, my dear. I knew it. I always said you was one—who's make her way in the world. Tho

mink one, did you say? I'll make it a bargain because you didn't forget old Daddy Cohen. It's straight from Fifth Avenue."

"Never mind the Daddy Cohen stuff," Joanna admonished him. "Trot out the wrap. I've been looking at it for three years now. I just want to get it out of your window—its tired on the eyes."

Mr. Cohen was not to be bantered; even about his famous mink wrap, which he kept in his window in the day time and in his safe at night—his one real bit of honest merchandise, and his proudest advertisement. He brought the wrap, with elaborate tenderness, from its window stand. Joanna, her own cloak thrown across the counter, put on the coveted mink with true nonchalance. She found all sorts of fault with it, accused it of being not second, but third hand, and pointed out to Mr. Cohen a score of mythical moth nests. Then she announced quite calmly:

"Just to do you a favor, you old skinflint, I'll take it along. I'm going to give it to my maid."

"Ah, yes!" the installment furrier retorted, with the smile of a trader who has traded well; "Furs for maids, that's the golden rule, my dear!"

Joanna knew the price. It had been displayed with the same pride as had been the coat, in the window. "One Thousand Dollars." "And," Joanna remarked as she opened her bag, "Worth every cent of half that much."

Mr. Cohen's eyes watered, gleamed and grew wiser than ever when the girl who owed him twelve dollars "back," and fifty odd to come on her last year's wrap, handed him three five hundred dollar bills with the reminder that she could count the change as well as he could.

As she turned to parade out of the store, triumphant in her first conflict with the unpleasant figures of her meager days, Mr. Cohen touched her softly on her shoulder. Reaching his lips close to where her ears nestled under her bobbed brown hair, he whispered:

"Maybe the rich gentleman will buy you another one, soon; maybe an ermine this time. I'll have one for you, cheap—right from Fifth Avenue."

Joanna turned upon him. "What do you mean, 'rich gentleman'?" she demanded, glints of steel emerging from her deep brown eyes.

Mr. Cohen meek and apologetic, but insidious still:

"Of course, my dear, I don't know anything about a rich gentleman. But when a pretty girl like you buys one mink coat, she buys an ermine coat next, and then, maybe, it's sables. And that's the way rich gentlemen improve if you handle them right, my dear—they go from mink to sables, quick. I'll have the sable one, too, when the rich gentleman that I don't know anything about and won't ask no questions about is ready!"

Tears, tears of rage, and some more; of fear, dimmed the deep brown eyes. Joanna went, stumbling a little, to her car. Before the chauffeur's formal stiffness, she shrank. She gave him a number and a street.

"It's where I live," she said. "I've got something to do there, and I guess I'll go and do it now instead of putting it off."

### CHAPTER V.

In the Drawing Room Only

While the limousine moved along in the endless procession of its kind, out of the neighborhood of the little fur-

rier whose experience of life in his own field had taught him that "furs for maids" inevitably meant "rich gentlemen," and into the beautiful shopping avenues where the dreams of women find reflection in the store windows, Joanna fought valiantly to assemble her wits and her understanding.

She tried to plan—and couldn't. Her brain, always in tune with events of the moment, things that went on around her, was unaccustomed to the burden of anything that had to do with tomorrow, or any deeper problem than the discovery of some new zest for today. Once John—funny old John, who had loved her for such a long time!—had taken her by the shoulders, syring her around, put his hand under her chin and forced it up so that she had to look up into his face, and had said:

"Will you really marry me, Joanna?"

And she had said: "Sure!"

## A HAPPY CHILDHOOD A MATTER OF HEALTH

Let Baby's Own Tablets Keep Your Children Well

Little children very quickly get out of sorts. By prompt treatment they can usually just as quickly be set right again. Most of their troubles arise in the first place from the stomach or bowels; that is why a good cleaning-out is the first thing prescribed by the doctor. Formerly castor oil was the means used to bring this about; now-a-days Baby's Own Tablets do the same work, but without trouble to the parent or discomfort to the little one. Children take Baby's Own Tablets happily because there is no nasty taste and because no gripping after-pains follow their use.

As a specific for childhood indigestion, vomiting, constipation, colic, colds, teething pains, etc., there is nothing to equal Baby's Own Tablets. They never do harm and always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Little Helps For This Week

Blessed are the merciful; for they shall obtain mercy. Matt. v. 7.

Teach me to feel another's woe, To hide the fault I see; That mercy I to others show, Thy mercy show to me.

—Alexander Pope.

No one thing does human life more need than a kind—consideration of men's faults. Everyone sins; everyone needs forbearance. Their own imperfections should teach men to be merciful. God is merciful because He is perfect. As men grow toward the Divine, they become gentle, forgiving, compassionate. The absence of a merciful spirit is evidence of the want of true holiness. A soul that has really entered into the life of Christ carries in itself a store of nourishment, and a cordial for helpless souls around it.—Henry Ward Beecher.

**Requisite on the Farm.**—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

## Rubber Bowls For Flowers

New Invention Is Practical and Has Many Advantages

Plant rubber bowls in classic design and various colors are now on the market for growing flowering bulbs, says Popular Mechanics. The advantages of their use are that they retain their shape, cannot break and will not mark the furniture. Furthermore, since they are soft and unaffected by moisture, they are not likely to cause stains on any surface upon which they may be placed.

**Praises this Asthma Remedy.** A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

## THEY SUFFER NO MORE

Two Women Owe Health to Lydia E. Pinkham's Vegetable Compound

St. Adolphe, Manitoba.—"I was very weak and had great pains during my periods so that I could not sweep the floor. The pains were in the right side and extended to the left and then down wards. It seemed as if the body was heavy and upside down. It is for these troubles I took the Vegetable Compound. I saw about it in a paper and one woman prevailed on me to take it. It has helped me in every way, the pains are less, and I have more appetite. It is a pleasure to recommend Lydia E. Pinkham's Vegetable Compound to other women."—LEA DELORME, St. Adolphe, Manitoba.

## THE MUTUAL LIFE INSURANCE CO. OF NEW YORK

The Mutual Life Insurance Company of New York is  
"The Oldest Life Insurance Company in America," and  
is one of the strongest financial institutions in the world.  
It was organized in 1842 on the MUTUAL basis; that is,  
there is no Capital Stock connected with the Company, the  
Policyholders owning and operating the company for their  
own benefit. Consequently, all assets belong to the policy  
holders and divisible "Profits" are paid to them annually.  
These may be taken in any one of the several different ways,  
which the agents will explain to interested parties. Full  
legal reserves are maintained to protect all insurance in force.

## Good Progress at Didsbury Well.

A. McNaughton, secretary-treas.  
of the Didsbury Sunburst Oils Ltd.  
states that the log of their well,  
received from Driller Elliott, shows  
the well down about 900 feet on  
May 15th. About 10,000 cubic ft.  
of gas was struck at 500 feet, "Red  
Beds" from 775 to 800 feet and  
from 840 to 850 feet. This is con-  
sidered a splendid indication.

Officers of the company are quite  
enthusiastic over prospects and  
President J. M. Reed and Director  
W. G. Liesemer left on Wednesday  
for the field to make whatever ar-  
rangements are deemed necessary.

It is expected that producing  
sands will be reached the last of  
this week.

Owing to painting, etc., still  
under way in our church, the  
next Sunday services will again  
be held in the Nazareth church at  
10.30 a.m. and 7.30 p.m. Rev.  
A. T. Jenner will again preach in  
the morning and Rev. Roppel in  
the evening.

The first Sunday in June has  
been chosen as the date of our  
Children's Day for Westcott Ev.  
Sunday School and the second  
Sunday in June for Didsbury.  
Program committees have been  
appointed at both places and are  
already at work. Remember  
the dates. Watch for further  
announcements.

Note and comment.—In an  
attempt to explain the ills of  
"modernism" and its departure  
from the "old time religion,"  
some one has said, "Today we  
are born in a hospital, married  
in a hotel and buried from an  
undertaker's parlor." Too many  
are forsaking the good old home  
and the church.

Keep to the right, go to church  
next Sunday.

one month has a monopoly of  
charm. To the seeing eye and  
observing heart, December and  
January are full of stern majesty.  
But May is so fresh, so sweet, so  
full of delight, so throbbing and  
thrilling with love and hope and  
joy that the duldest and most  
world weary heart beats a little  
faster at the touch of its mystic  
fingers.

There is always an element  
of surprise in May. It is always  
a new thing, fresh and un-  
expected.

We have had it annually since  
our childhood, yet when it comes  
again, it is as a stranger from the  
glory. That is one mark of the  
Genius of God. His gifts come  
so regularly yet they never weary.  
They reach us a thousand times,  
but the thousand and first they  
are still wonderful, surprising,  
touched with dew.

The subject for Sunday, May  
23 is "The Four elements of a  
complete life." Every boy and  
girl of the teen age should hear  
this, as well as the adults.
